

# SECURITY SOLUTIONS

## Secure Function Lock / Setting Lock

**SOLUTIONS & SERVICES PORTFOLIO**

**Secure Function Lock** is a built-in solution that offers control over who has access to a machine and what functions they are allowed to use. Page limits and printing restrictions help manage costs and allow setting permissions for users to print in color.

Secure Function Lock allows an administrator to restrict public access to specific functions and to define what features can be accessed by user or group. This solution works with the optional Secure Print+ feature to hold print jobs at the machine for secure job release.

**Setting Lock** allows an administrator to set a password to block unauthorized access to machine settings. Secure machine configuration helps prevent confidential information from falling into the wrong hands.

### SECURE FUNCTION LOCK

Environments seeking secure workflows with easy card authentication and cost control.

Built-In Solutions

Scan Solutions

Tracking & Reporting

### SETTING LOCK

Environments with security requirements that require restrictions on who can change machine settings.

Built-In Solutions

#### Activity Reports

Receive activity reports based on users or groups when the Job Logging feature is enabled.

#### Cost Effective

Avoid the expense of management software, servers, and external card readers.

#### Authorize Access

Configure passwords for selected users to grant access to functions or to set page limits.

**Secure Function Lock** allows an administrator to restrict public access to specific functions and to define what features can be accessed by user or group.

#### Restricted Functions

"User List" settings need to be configured after "Restricted Functions". "Restricted Functions" enables you to manage the restrictions per user or group.
